**Table MCTE3:** Please read the following about hyperloop technology. Hyperloop is a new form of ground transport currently in development that would allow passengers to travel at over 700 miles per hour in a pod inside large low-pressure tubes. With speeds approaching 700 miles per hour, hyperloop technology could travel from Los Angeles to San Francisco or from Washington, D.C. to New York City in around 30 minutes. Knowing what you know now, how interested are you in using hyperloop transportation when it becomes available?

With speeds approaching 700 miles per hour, hyperloop technology could travel from Los Angeles to San Francisco or from Washington, D.C. to New York City in around 30 minutes. Knowing what you know now, how interested are you in using hyperloop transportation when it becomes available?

**Table MCTE5\_3:** Please read the following about hyperloop technology. With traveling at such high speeds, safety and comfort are a clear concern for hyperloop developers. However, companies such as Virgin Hyperloop say the experience will feel similar to traveling in a commercial passenger plane and have tested the experience with actual passengers. Knowing what you know now about hyperloop technology, how concerned are you about the following aspects of hyperloop?
