Table POL15_1: *As you may know, reconciliation is a process that allows for some bills to be passed by Congress via a budget process that only requires a simple majority. Democrats in Congress are planning to include a drug pricing proposal in their reconciliation bill that would allow the federal government to directly negotiate the prices of some prescription drugs through Medicare.The Congressional Budget Office estimates that this would pressure drugmakers to lower their prices and as a result reduce federal spending by $456 billion, but could also result in fewer drugs being introduced to the U.S. market over time.Do you support or oppose this drug pricing plan...?*
