

National Tracking Poll #2201037
January 08-09, 2022

Crosstabulation Results

Methodology:

This poll was conducted between January 8-January 9, 2022 among a sample of 2200 Adults. The interviews were conducted online and the data were weighted to approximate a target sample of Adults based on gender, educational attainment, age, race, and region. Results from the full survey have a margin of error of plus or minus 2 percentage points.

Table MCHE2: *The following questions refer to issues related to health insurance coverage. If you have private or employer-based health insurance, in-network refers to health care providers that have a contract with your health insurance company and will accept your insurance. Out-of-network refers to health care providers that do not have a contract with your health insurance company and will not accept your insurance. Surprise or unexpected billing occurs when a person with private or employer-based health insurance receives treatment from a provider or facility that is unknowingly out of their health insurance network and is billed the additional costs that their insurance company will not cover. Have you or your family ever received a surprise or unexpected medical bill(s)?*

Table MCHE2: *The following questions refer to issues related to health insurance coverage. If you have private or employer-based health insurance, in-network refers to health care providers that have a contract with your health insurance company and will accept your insurance. Out-of-network refers to health care providers that do not have a contract with your health insurance company and will not accept your insurance. Surprise or unexpected billing occurs when a person with private or employer-based health insurance receives treatment from a provider or facility that is unknowingly out of their health insurance network and is billed the additional costs that their insurance company will not cover. Have you or your family ever received a surprise or unexpected medical bill(s)?*
