

National Tracking Poll #2201140
January 21-23, 2022

Crosstabulation Results

Methodology:

This poll was conducted between January 21-January 23, 2022 among a sample of 2005 Registered Voters. The interviews were conducted online and the data were weighted to approximate a target sample of Registered Voters based on gender by age, educational attainment, race, marital status, home ownership, race by educational attainment, 2020 presidential vote, and region. Results from the full survey have a margin of error of plus or minus 2 percentage points.

Table Index

1	Table MCER1: <i>Thinking ahead to 2050, do you think that oil and gas companies will be . . .</i>	3
2	Table MCER2: <i>How much have you seen, read or heard recently about Exxon Mobil, the oil and gas corporation, announcing that it set a goal to reduce or offset greenhouse-gas emissions from its operations to net zero by 2050?</i>	7
3	Table MCER3: <i>Many oil companies – such as Shell, Exxon, Chevron, and BP – have committed to reducing or offsetting greenhouse-gas emissions from their operations to net zero by 2050. When it comes to taking action on climate change, do you think these commitments are</i>	11
4	Table MCER4: <i>Please read the following: According to the global framework for accounting for greenhouse gas emissions, Scope 1 and Scope 2 emissions come directly from a company’s operations (for instance, methane released from fracking or electricity used by refineries). Scope 3 emissions are all other emissions associated with a company’s activities or products, including with its customers (for instance, customers’ cars burning gasoline). Some oil and gas companies, such as Shell, have pledged to reduce all three types of emissions, while others, such as Exxon, have only pledged to reduce the first two. Scope 3 emissions make up the bulk of a company’s emissions. Knowing what you know now, do you think major oil and gas companies have a responsibility to reduce only Scope 1 and 2 emissions, or all three?</i>	15
5	Table MCER5: <i>Once again, thinking ahead to 2050, do you think that oil and gas companies will be</i>	20
6	Table MCERdem1: <i>How concerned are you with the issue of climate change and its impacts?</i>	24
7	Table P1: <i>Now, generally speaking, would you say that things in the country are going in the right direction, or have they pretty seriously gotten off on the wrong track?</i>	28
8	Table nr2b: <i>Do you approve or disapprove of the job Joe Biden is doing as President?</i>	32
9	Table P3: <i>Now, thinking about your vote, what would you say is the top set of issues on your mind when you cast your vote for federal offices such as U.S. Senate or Congress?</i>	36
10	Summary Statistics of Survey Respondent Demographics	41

Crosstabulation Results by Respondent Demographics

Note: Row proportions may total to larger than one-hundred percent due to rounding. For more information visit MorningConsultIntelligence.com.

Table MCER4: Please read the following: According to the global framework for accounting for greenhouse gas emissions, Scope 1 and Scope 2 emissions come directly from a company's operations (for instance, methane released from fracking or electricity used by refineries). Scope 3 emissions are all other emissions associated with a company's activities or products, including with its customers (for instance, customers' cars burning gasoline). Some oil and gas companies, such as Shell, have pledged to reduce all three types of emissions, while others, such as Exxon, have only pledged to reduce the first two. Scope 3 emissions make up the bulk of a company's emissions. Knowing what you know now, do you think major oil and gas companies have a responsibility to reduce only Scope 1 and 2 emissions, or all three?
