Table GR20: As you may know, reshoring means that a company will start using American workers to assemble the goods it sells in the U.S., instead of using foreign workers based in other countries. Another option is 'friend-shoring', meaning companies will use workers in countries friendly to the US, such as workers in the European Union, to assemble the goods they are selling in the United States. Based on what you know, which of the following comes closest to your opinion, even if neither is exactly right?

Demographic	I would be willing to pay more for the company's goods if it starts using only U.S.-based workers to assemble them, instead of foreign workers.		I would be willing to pay more for the company's goods if it starts using U.S. and/or European workers to assemble them, instead of other foreign workers.
