VIRTUAL TEAM INTERVIEWS AKA “THE ONSITE”

Our team Zoom interviews are generally broken into three or four 45-minute to hour-long sessions with teammates and peers from other teams who you'll work and interact with on a regular basis. We think it's important to provide you with the opportunity to speak with people you'll be working closely with, as well as other relevant internal team members. Each session will focus on specific skills and attributes that are needed to be successful in the role

“Onsite” Interviews are rooted in behavioral-based questions, but with more specific areas of focus relevant to each given role. These interviews might also focus on technical skills that are required of the role through case studies or other analytical exercises - if you completed a take home assessment, you should come prepared to discuss your work.

For these interviews, we use the STAR method. The STAR method is a structured manner of responding to a behavioral-based interview question by discussing the specific situation, task, action, and result of the situation you are describing. Please come prepared with specific examples to share from your previous experience, as well as questions you might have that are role or team specific.

EXAMPLE QUESTIONS

Here are some examples of behavioral-based questions:

- When did you take a risk, make a mistake, or fail? How did you respond, and how did you grow from that experience?
- Describe a time you took the lead on a project.
- What did you do when you needed to motivate a group of individuals or promote collaboration on a particular project?

WHY BEHAVIORAL INTERVIEWS?

Behavioral interviews are an important aspect of eliminating bias from our hiring decisions. They are designed to create a consistent experience so that all candidates can be fairly evaluated based on the same set of criteria.

A PARTING WORD...
